

# BULK TRADER materials management made easy

**BULK TRADER** is a sophisticated computer system designed to manage the buying and selling of materials for chemical and food traders.

**BULK TRADER** easily controls the purchase of materials, direct sales, stock holding, blending, packing and delivery of packed and bulk goods. **BULK TRADER** is one of the family of systems developed by Ideal Business Services Ltd for the logistics and distribution industries.

## **BULK TRADER offers your operation a host of benefits...**

- Bulk goods are controlled by weight and can be delivered direct from supplier to customer or received from the supplier to a bulk tank in store.
- Bulk goods in store can be blended and/or made into packed goods.
- Packed goods are controlled by weight and pack size and can be delivered direct from the supplier or received into store.
- Packed goods in store can be transferred to bulk or repacked.
- The system controls products by weight, value in any chosen currency and produces all documentation and sales invoices automatically. Documents can be sent from the system by fax or email.
- **BULK TRADER** provides complete traceability and stock control as well as a comprehensive range of financial management reports.

## **Customised to your specific needs...**

**BULK TRADER** is modular in design and as such can be easily customised to meet each organisation's specific requirements.

For your complete peace of mind the system is fully supported via our in-house support desk. We're here to help!

**BULK TRADER** has been rigorously tested by **The White Sea & Baltic Co Ltd** of Leeds, who have been successfully using the system for almost a decade to supply a wide range of products to the pharmaceuticals, cosmetics, plastics, oils, lubricants, detergents and other industries. The system is also installed at F. Holm Chemie Handels GmbH, Germany, part of **KLK Oleo Europe GmbH**.

**BULK TRADER** operates on industry standard Microsoft and PC hardware/software platforms in a Client/Server environment:

### **Server**

Microsoft Windows 2000/2003  
Linux  
IBM UniData/NT Multi-dimensional Relational Database System Builder/NT 4<sup>th</sup> Generation Application Generator

### **Client**

Microsoft Windows 98 or XP  
SB Client

All functions are fully integrated and utilise on-line processing techniques, including features such as immediate data validation.

*"complete traceability  
and stock control"*

- Comprehensive range of reports from all aspects of the system

## Ideal Testimonials...

*"We feel the bespoke chemicals trading system that Ideal have designed and implemented for us has given our company tremendous benefits, including most importantly accurate stock control together with the control of sale and purchase contracts, sales invoicing, control of product blending and production, all interfacing directly with the financial accounts system.*

*The solution has been bespoke designed to meet our exact requirements and the additional modifications and ongoing support have been excellent in every respect. Ideal is always there when we need you – which means that WSB is always there when our customers need us!"*

**THE WHITE SEA AND BALTIC COMPANY**

*"We are working with you now 3 years since you established the system on our server. We are fully satisfied with your work and service. Despite the comparatively long distance between our companies you have always been able to do necessary service works through the Internet or on phone quickly and to our satisfaction."*

**F. HOLM CHEMIE HANDELS GmbH, Germany**
