Cloud4 Spam Filtering

The two main tools utilised in most organisations are Email and the Internet. Email is used as a primary method of communication and although it is effective like the internet it can leave you prone to virus attacks and spam emails, which are becoming an ever growing issue for many organisations that rely on email and the internet.

The Cloud4 Spam & Virus Filtering is a fully managed Anti-Virus and Anti-Spam service which guarantees your servers, desktops and all your systems remain clean from spam and security threats ensuring you and your workforce can work without any disruption.

Our Spam & Virus Filtering solution is affordable for businesses of all sizes and there are no upfront costs or annual renewal costs. This pay as you go service makes it the most affordable spam and virus protection solution available.

Typical Features of Cloud4 Spam & Virus Filter include:

- Spam & Virus Filter
- Anti-Spoofing & Anti-Phishing
- Anti-Spyware
- Header & Text Analysis
- Outbound Email Filtering
- No Software Installation Required
- Denial of Service Protection
- Directory Harvest Protection
- Compliance

Get your business protected cost effectively by Cloud4 Spam Filtering today and get your first month **FREE**. Just contact your Cloud4 Partner today.
